

Orange Legal Technologies' Processing Services help identify and eliminate irrelevant document sets early in the audit, investigation, or litigation process. This capability is provided by our internally developed, best-of-breed technology - the OneO® Discovery Platform.

Our OneO® Processing Services include:

- **Data Filtering** - provides the capability to filter data by date ranges, extensions, custodians, and key words as well as allows for system file filtering against the NIST database using the MD5 hashing algorithm.
- **Data Deduplication** - is provided using the MD5 hashing standard and can be accomplished throughout processing at both the global and/or the document family group level.
- **Metadata Extraction** - allows for the efficient capture of system, file, and field metadata for most unstructured data formats.
- **Full Text Extraction** - is conducted automatically in OneO® Processing and is augmented as required by streamlined exception handling procedures to support secondary extractions via OCR and print driver text recognition.
- **Data Conversion** - allows for the full conversion of native file formats into high quality TIFF images and PDF documents while also supporting native file linking.
- **Load File Preparation** - allows for the seamless production of standard output files based on XML, Pass Through, Image, Native, and Proprietary Database Load Formats to ensure ease of use with industry standard review tools to include OneO® Review.
- **Custom Database Development** - allows for the proactive development of custom databases that enable the usage of non-standard review tools and technologies with OneO® Processing.
- **Attachment Handling** - handles attachments using industry-standard methods, extracting them from their parent e-mails and utilizing database field values to maintain the parent/child relationship.
- **Exception Reporting** - allows the client to generate numerous reports on the fly through the OneO® Discovery Platform. Project Managers can also generate fully customized reports with the assistance of database technicians.

Our OneO® Processing Services are able to process data from a variety of formats to include:

- Electronic Text to Electronic Text via Text Extraction Engines
- Electronic Images to Electronic Text via OCR
- Hard Copy Images to Electronic Text via OCR
- Audio to Electronic Text via Sound Extraction Engines

We Support these OneO® Processing Services with:

- Secure Hosted Repositories
- Extensive/Customizable Reporting
- Integrated Review Services
- Dedicated Project Management/Customer Support
