

Orange Legal Technologies and BlackStone Discovery Partner to Deliver SaaS-Based Rapid Response E-Discovery Services to Silicon Valley Firms

Integration of OneO™ Discovery Platform into Service Portfolio Provides BlackStone Discovery Clients Immediate Access to Analytics (Early Case Assessment), Processing, and Review

(Salt Lake City, UT and Palo Alto, CA) Orange Legal Technologies, a leading provider of one source litigation, audit, and investigation support services for law firms and corporations seeking insight on electronically stored information, today announced a technology partnership allowing BlackStone Discovery to integrate the OneO® Discovery Platform into its existing electronic discovery service portfolio. The strategic partnership with Orange Legal Technologies enables BlackStone Discovery clients to reduce electronic discovery times, and costs, by 50% while also reducing risk when compared to non Software-as-a-Service (SaaS) based electronic discovery offerings.

"This new partnership between BlackStone Discovery and Orange Legal Technologies solidifies the OneO® platforms' footprint in Silicon Valley," stated Bret Laughlin, President and CEO of Orange Legal Technologies. "Based on the fact that BlackStone Discovery serves as the preferred electronic discovery consultant for many of the leading international law firms and corporations with a presence in San Francisco, Palo Alto, and San Jose, our new partnership is already off to a successful start as a large government organization in the Silicon Valley has chosen to work with BlackStone Discovery powered by OneO®."

"There are many software applications available for early case assessment, processing and hosting," shared John Kelly, President and CEO of BlackStone Discovery. "After extensive analysis and evaluations of available technologies, it became clear that OneO®'s integrated suite of technology was the right fit for our law firm & corporate clientele. We are committed to partnering with best in class companies, and this alliance combines the strength and efficiency of BlackStone Discovery's own Rapid Response Methodology with OneO®'s superior cost-savings and speed."

To Learn More

The OneO® Discovery Platform provides law firm and corporate legal professionals with an integrated, web-accessible, forensically sound electronic discovery platform that enables online analytics, processing, and review of data from the security of a hosted centralized repository. To learn more about how the OneO® Discovery Platform can quantifiably save users 1/2 the time, 1/2 the cost, while lowering the risks associated with traditional electronic discovery approaches, contact Orange Legal Technologies today via website (<http://www.orangelt.com/technology>), email (info@orangelt.com), or phone (1.415.989.7922).

About Orange Legal Technologies

Orange Legal Technologies is a leading electronic discovery provider of one source litigation, audit, and investigation support services for law firms and corporations seeking insight on electronically stored information. Headquartered in Salt Lake City, Utah, and with four locations nationwide, OrangeLT™ offers a complete suite of electronic discovery services to include collection, analysis, processing, review and production of both digital and paper-based information. Enabled by the OneO® Discovery Platform—an integrated, web-accessible electronic discovery platform that provides online analysis, processing, and review of unstructured data from the security of a hosted centralized repository—and augmented by best of breed electronic discovery partners, Orange Legal Technologies has participated as a member of the Electronic Discovery Reference Model (EDRM) and the International Legal Technology Association (ILTA).
