

Tired of wading through unnecessary data?

Get to the data you need quickly.

The OneO® Discovery Platform is an integrated, web-accessible, forensically sound electronic discovery platform that enables online analytics, processing, and review of data from the security of a hosted centralized repository.

With OneO®, legal teams can easily:

Analyze data to get an early understanding of the key files, times, and people involved in potential litigation.

- Data Indexing
- Data Reduction and Organization
- Data Understanding
- Early Case Assessment

Process appropriate data as determined during Early Case Assessment with key capabilities to include:

- Data Filtering
- Data Deduplication
- Metadata Extraction
- Full Text Extraction

Review processed data with an integrated and intuitive tool that provides reviewers with key features such as:

- Foreign Language Support
- Web Based Users Access
- Integrated Collaboration
- Audit and Report Customization
